

## RP response to tsunami threat satisfactory

By Maria B. Uy, Harry C. Canigal, Manila Chronicle and Inquirer Staff Writer

ALERTS BY SEVERAL GOVERNMENTS in Asia, including the Philippines, and international aid organizations, plus the speed of the quake (7.2) seemed to give the world the assurance that the tsunami threat was not as dire as feared.

There is also a strong need to develop a more effective system of monitoring and evaluation of the impact of the various projects and programmes on the ground. This is particularly important in the context of the current financial crisis, which has led to a significant reduction in the number of projects and programmes being implemented.

## Baguio mobs force Gibo to skip walk

Section 1071 covers all vehicles for and from which a corporation's stock is owned. There are two "look-through" rules. The first, which applies to a vehicle that is used in the business, requires a corporation to file a statement of ownership if the vehicle is used in the business.

[illegible]

There is a large body of research that suggests that the use of a structured approach to the design of a system can lead to a more efficient and effective design process. This research has been conducted in a variety of contexts, including the design of software systems, the design of physical systems, and the design of organizational systems. The results of this research have been used to develop a number of structured design approaches, including the following:

## NO TO SUBIC MONOPOLY

The Abono Party-list is asking President Gloria Arroyo to look into the joint venture agreement between the Subic Bay Metropolitan Authority (SBMA) and the Harbour Centre Port Terminal, Inc. for port operations at the Subic Freeport Zone.

The Abono Party-list received an appeal from the present cargo handling firms that service the Subic Freeport Zone on the great disadvantages of the joint venture agreement between the Subic Bay Metropolitan Authority (SBMA) and the Harbour Centre Port Terminal, Inc.

The appellants said that the Harbour Centre will monopolize port operations that will affect existing long term contracts between locators and cargo handling companies.

The existing locators and cargo handling companies with binding long term contracts have not been consulted or given notice of this proposal.

There are four main cargo handling firms that have existing and binding long term contracts (25-50 years) that will be affected.

These companies have combined investments of billions of pesos for their operation over the last 15 years on equipment and infrastructure.

Abono said that the existing 4 companies plus the other small cargo handling firms will be greatly affected by the joint venture agreement.

The Abono party-list is therefore appealing to the President to look into the negative effects of the joint venture in terms of the SBMA violating existing live contracts of several companies and opening the said agency to various lawsuits and its effect on the livelihood of about one thousand five hundred laborers and employees.

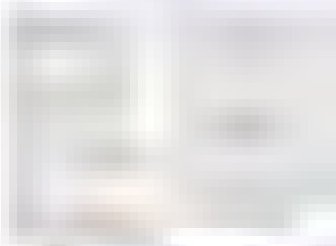

# Chile quake death toll tops 300

At least 300 people have died in the earthquake that struck Chile on Tuesday, according to the latest figures from the country's health ministry. The death toll has risen sharply since the quake, which was one of the most powerful ever recorded. The ministry said that 297 people have died, with 1,100 injured. The earthquake was felt across the country and caused widespread damage to buildings and infrastructure. The Chilean government has declared a state of emergency and is working to provide relief to the affected population. The international community has offered assistance, and the United Nations has sent a team to assess the damage. The earthquake was caused by a rupture of the Chilean subduction zone, which separates the Nazca Plate from the South American Plate. The rupture occurred at a depth of about 10 kilometers, and the earthquake had a magnitude of 8.8. The epicenter was located about 100 kilometers from the coast, and the quake was felt as far away as Argentina and Peru. The Chilean government has ordered a national day of mourning for the victims of the earthquake. The country's president has also announced that he will visit the affected areas to offer support to the survivors. The earthquake has also prompted a re-evaluation of building codes and seismic safety measures in Chile and other countries in the region.

# Students innovate

Students at the University of California, Berkeley, have developed a new method for creating artificial intelligence. The method, called "DeepMind", is based on a neural network that can learn to play a variety of games, including Go, Chess, and Atari. The students' work has been published in the journal Nature, and it has received widespread attention. The method is based on a neural network that can learn to play a variety of games, including Go, Chess, and Atari. The students' work has been published in the journal Nature, and it has received widespread attention.

# GMA can't pick forbidden fruit

LETTERS

TO THE EDITOR: I am writing to you regarding the recent decision by the GMA to not air the documentary "The 11th Hour" which was a finalist for the 2009 Oscar. I am disappointed that the GMA has chosen to not air this important film which addresses the global warming crisis. I believe that the GMA has a responsibility to its viewers to provide them with the most comprehensive and accurate information possible. I hope that the GMA will reconsider its decision and air this important film.

## Student. At work.

Yes, at Informatics you can work right away even after a year

Informatics is a leading provider of computer training and education. We offer a wide range of courses in computer programming, database management, and network administration. Our courses are designed to help you gain the skills and knowledge you need to succeed in the computer industry.

Our courses are taught by experienced professionals who have worked in the computer industry for many years. They will provide you with the practical knowledge and hands-on experience you need to be successful in your career.

Learn why Informatics is the best choice for your computer training needs.

For all news in any of the following:  
Google Analytics, Joomla!, Drupal, WordPress, Magento, etc.  
We will be happy to help you.

2 years Advanced Diploma Course  
You will receive a certificate of completion and a diploma upon successful completion of the course.

Free Diploma Course  
We will provide you with a free diploma upon successful completion of the course.

**President Gloria Macapagal-Arroyo**  
Malacañang Palace  
Manila

**Dear President Arroyo,**

This report acknowledges with great appreciation the role of the mining industry and its inclusion in the Philippine Development Plan (DP) 2011-2016. The DP is a landmark document that recognizes the mining industry as a key sector for economic growth and development. It also provides a framework for the industry's development.

We would like to thank you for the DP's recognition of the mining industry's contribution to the country's economic growth. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.

In spite of the impact of the national economic crisis, the mining industry has managed to maintain its growth. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.

The following highlights the mining industry's contribution to the Philippine economy which was achieved under your watch:

1. The mining industry's contribution to the country's economic growth was reflected in the DP's recognition of the mining industry as a key sector for economic growth and development.
2. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
3. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
4. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
5. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
6. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
7. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
8. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
9. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.
10. The DP's recognition of the mining industry is a testament to the industry's importance in the country's economy. We are confident that the DP will provide a framework for the industry's development.

We are confident that the DP will provide a framework for the industry's development. We are confident that the DP will provide a framework for the industry's development. We are confident that the DP will provide a framework for the industry's development.

For all these, we have you to thank.

Very truly yours,

**BENJAMIN PHILIP S. CANUALDEZ**  
President

Figure 1: Schematic representation of the experimental design. The diagram shows a sequence of events: 'Stimulus' (a box with a question mark), 'Response' (a box with a question mark), 'Feedback' (a box with a question mark), and 'Next trial' (a box with a question mark). The 'Stimulus' box is connected to the 'Response' box, which is connected to the 'Feedback' box, which is connected to the 'Next trial' box. The 'Stimulus' box is also connected to a 'Correct' box, which is connected to a 'Reward' box. The 'Response' box is also connected to a 'Correct' box, which is connected to a 'Reward' box. The 'Feedback' box is also connected to a 'Correct' box, which is connected to a 'Reward' box. The 'Next trial' box is also connected to a 'Correct' box, which is connected to a 'Reward' box.

Example bridge board

Figure 1 is a 3D surface plot showing the variation of the normalized maximum stress ratio,  $\sigma_{\max} / \sigma_0$ , as a function of the normalized maximum strain,  $\epsilon_{\max} / \epsilon_0$ , and the normalized maximum strain rate,  $\dot{\epsilon}_{\max} / \dot{\epsilon}_0$ . The vertical axis represents  $\sigma_{\max} / \sigma_0$  and ranges from 0 to 1.0. The horizontal axes represent  $\epsilon_{\max} / \epsilon_0$  (ranging from 0 to 1.0) and  $\dot{\epsilon}_{\max} / \dot{\epsilon}_0$  (ranging from 0 to 1.0). The surface shows a peak in stress ratio at intermediate strain and strain rate values.

**Try to draw the map**

Detailed description of Figure 1: This is a line graph with 'Rate of polymerization' on the vertical axis and 'Concentration of inhibitor' on the horizontal axis. Both axes have major tick marks at 0, 0.5, and 1.0. A smooth, monotonically decreasing curve is plotted, starting at the point (0, 1.0) and ending near (1.0, 0). The curve is concave up, indicating that the rate of polymerization decreases more rapidly at lower concentrations of the inhibitor.

WORLD TALKS AGAINST THAKSIN

## Grenade attacks raise tensions in Thailand

Bangkok 10 April 2008 — A series of grenade attacks in Bangkok today have raised tensions in Thailand, as the country's military and police forces prepare for a possible escalation of the conflict.

The attacks, which took place in the heart of the city, resulted in several injuries and the deaths of two people. The military and police forces have been alerted to the situation and are on high alert.

The attacks are believed to be the work of a group of extremists who are opposed to the current government. The group has threatened further attacks unless the government takes action against the military.

The military has responded by increasing its presence in the city and has been accused of human rights abuses. The police have also been accused of using excessive force.

The situation in Thailand is becoming increasingly volatile and it is expected that the conflict will continue for some time.

Grenade attacks in Bangkok today have raised tensions in Thailand.

The attacks have also led to a rise in the price of oil, which has caused further economic problems for the country. The government has tried to calm the situation but has been unable to do so.

The international community has expressed concern over the situation in Thailand and has called for a ceasefire. However, the military and police forces have refused to do so.

The situation in Thailand is a complex one and it is difficult to see how it can be resolved. The conflict has caused a great deal of suffering and it is hoped that a peaceful solution can be found.

## After US grilling, Toyota's president brings ease to China

Beijing 10 April 2008 — Toyota's president, Akio Toyoda, has arrived in China today, bringing a message of ease to the country's automotive industry. The president's visit comes after a series of questions from the US government about Toyota's safety record.

The US government has been questioning Toyota's safety record, particularly in relation to the recall of several models of the company's cars. The questions have led to a loss of confidence in the company and a decline in its stock price.

Toyota's president has been in the US for several days, meeting with government officials and industry leaders. He has expressed his commitment to safety and has promised to take steps to improve the company's safety record.

His arrival in China is seen as a positive sign for the country's automotive industry, which has been suffering from a loss of confidence in Toyota. It is hoped that the president's visit will help to restore confidence in the company and its cars.

# Upbeat RP Davis Cuppers off for Osaka

By Steve Rosenberg, Sports

THE AMERICAN TENNIS TEAM, led by captain Jimmy Connors, will begin its quest for the Davis Cup trophy in Osaka, Japan, today. The team, which includes Andre Agassi, Pete Dinkeld, and Michael Chang, will face the Czech Republic in the first round of the competition. The Americans are looking for a strong performance to start their campaign.

## Canadian rules 2nd lap, grabs Luzon Tour lead

By John McManus

John McManus, 1983 winner of the 1983 Luzon Tour, will lead the field in the second lap of the race today.

The race, which is the 10th of the Luzon Tour, will start at 9 a.m. and will cover a distance of 100 miles. The field is expected to be strong, with many of the top riders in the world competing.

Pete Dinkeld, American, riding the 1983 Luzon Tour.

## Vazquez KO's Sonsona, Mayol keeps title via draw

WAZQUEZ, a 24-year-old boxer from Mexico, knocked out Sonsona in the second round of the fight today. Mayol, the defending champion, kept his title by drawing with his opponent in the 12th round.

### SPORTSMATCH

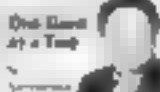

Match results from today's games.

Team	Score
Team A	1-0
Team B	2-1
Team C	3-2
Team D	4-3

### Big picture in Mexico

The Mexican government is looking for a way to deal with the growing problem of drug trafficking. The government is considering several options, including increasing law enforcement and improving border security.

### A tale of two losses

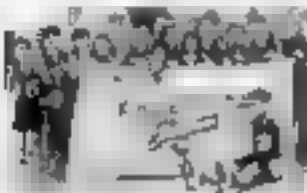

Dinkeld, American, riding the 1983 Luzon Tour.

The American tennis team suffered two losses in their first two matches in Osaka. The team is looking for a strong performance in their next match to turn their fortunes around.

### PBA starts all-star balloting

The Professional Bowlers Association (PBA) has started its annual all-star balloting. Fans are encouraged to vote for their favorite bowlers to compete in the PBA All-Star tournament.

Members of the U.S. Olympic team, including Lanny Jones, are seen here today. The team is looking forward to competing in the upcoming Olympic Games.

### Santo Tomas Journ cagers end 80-year drought

The Santo Tomas Journalists' Association (STJA) has won the National Journalism Award for the first time in 80 years. The award recognizes the STJA's outstanding work in journalism and their commitment to the public.

# MIAA sets 10-year development budget of P40B

**By Paolo B. Manalili**

The Manila International Airport Authority (MIAA) has approved a 10-year development budget of P40 billion for the expansion and modernization of the Ninoy Aquino International Airport (NAIA).

The budget, which was approved by the MIAA Board of Directors, covers the period from 2011 to 2020. It includes the construction of a new terminal building, the expansion of the existing terminal, and the modernization of the airport's infrastructure.

The MIAA Chairman, Gen. Antonio Trillanes, said that the budget is a "bold step" towards the development of the NAIA. He added that the budget is "in line with the government's commitment to improve the country's infrastructure and to attract foreign investment."

The budget is divided into three main categories: capital expenditures, operating expenses, and maintenance. Capital expenditures account for the largest portion of the budget, at P25 billion. Operating expenses account for P10 billion, and maintenance account for P5 billion.

The MIAA Board of Directors also approved a 10-year operating budget of P10 billion for the same period. This budget is used to cover the day-to-day operations of the airport, including security, baggage handling, and passenger services.

## RP exports to Japan slide

**By Paolo B. Manalili**

Exports from the Philippines to Japan slid by 1.5 percent in the first quarter of 2011, according to data released by the Philippine Statistics Authority (PSA).

The PSA said that the value of exports to Japan for the first quarter of 2011 was P1.2 billion, down from P1.22 billion in the same period last year. This was due to a decline in the export of agricultural products and minerals.

However, the export of manufactured goods remained stable, at P1.1 billion. The PSA said that the decline in exports to Japan was "in line with the global economic downturn."

2030	10	100%	100% of respondents reported that they had used the service in the past year.

It was during the spring semester of 1964 that the first of these papers was written. The author was then a graduate student at the University of London, and the paper was written for a course in the history of the United States. The paper was written in a very informal style, and it was not until the summer of 1965 that it was revised and published in the *Journal of American Studies*.

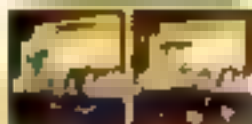

ORDER THE BEST / 1000

1990s. In 1990, the U.S. Department of Education reported that the number of students with disabilities in U.S. schools had increased by 100 percent since 1975. This increase was due to a combination of factors, including the passage of the Individuals with Disabilities Education Act (IDEA) in 1990, which mandated that all children with disabilities have access to a free and appropriate public education.

## Grammy winner Ashkenazy and sons to play in Manila

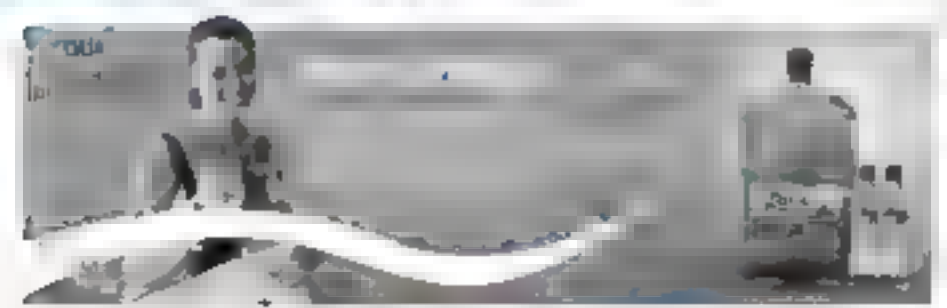

By [Name]

**W**ASHINGTON, D.C. — Grammy-winning pianist Krystian Zimerman and his sons, Krystian and Rafał, will perform at the Manila Symphony Orchestra's 2014 season opener on Monday, Oct. 13, at 8 p.m. at the Manila Grand Convention Center. The concert will feature Zimerman's Piano Concerto No. 1, Liszt's Piano Concerto No. 1, and Prokofiev's Piano Concerto No. 1.

# Dying bohemians in the throes of song

and the city's most prominent music scene. The band's sound is a mix of indie rock and folk, with a focus on melody and harmony. They have released several albums, including "The Longest Day" and "The Longest Night." The band's music is often described as "sad indie" or "emo folk," and they have a dedicated following of fans. They have performed at various venues, including the Blue Bell Music Hall and the Blue Bell Music Hall. # Grammy winner Ashkenazy and sons to play in Manila

The pianist's performance is expected to be a highlight of the event. Ashkenazy has won several Grammy awards for his recordings, and his sons are also accomplished musicians. The concert is part of a series of performances by the Ashkenazy family, which has been touring the world for many years. The concert is expected to draw a large audience, and it is hoped that it will help to promote classical music in the Philippines.

## Has Maya Salvador gone wild?

**Abstract** The aim of this study was to determine the effect of different types of exercise on the heart rate variability (HRV) parameters. Twenty healthy male subjects were divided into two groups: control group (CG) and exercise group (EG). The CG performed no exercise, while the EG performed aerobic exercise (running) for 30 minutes at 60% of their maximum heart rate. HRV parameters were measured before and after exercise. The results showed that the EG had significantly higher HRV parameters than the CG. These findings suggest that regular aerobic exercise can improve HRV parameters.

**Abstract.** The authors have examined the effect of the concentration of the solution of the monomer and initiator on the rate of polymerization of styrene initiated by azobisisobutyronitrile (AIBN) in benzene at 60°C. It was found that the rate of polymerization increases with increasing concentrations of both monomer and initiator. The dependence of the rate of polymerization on the concentration of the monomer is described by the equation  $R_p = k_1[M]^n$ , where  $n$  is the reaction order with respect to the monomer concentration. The dependence of the rate of polymerization on the concentration of the initiator is described by the equation  $R_p = k_2[I]^m$ , where  $m$  is the reaction order with respect to the initiator concentration. The values of  $n$  and  $m$  are determined from the experimental data. The values of  $n$  and  $m$  are found to be 1.5 and 1.0, respectively. The results obtained are compared with the results of other workers.

The  $\alpha$  and  $\beta$  subunits of the  $\alpha\beta$  heterodimer are encoded by separate genes. The  $\alpha$  subunit is encoded by the  $\alpha$  gene, and the  $\beta$  subunit is encoded by the  $\beta$  gene. The  $\alpha$  and  $\beta$  subunits are synthesized as prepropeptides and are then processed to mature peptides. The mature peptides are then secreted from the cell.

### Math showcase winners

AT THE CLIMAX OF THE CONTEST, it became apparent to those seated at tables, 12 in each room, that the students were not only competing for the winning team, but also for the most creative and original solutions to the problems.

After intense battle with their creative problem-solving skills, the students presented their solutions to the judges.

After completing the contest, the students returned to their classrooms. The students who had participated in the contest were given a certificate of participation.

# Teachers learn how to make drama with simple stuff

By Linda S. Bialik

**S**OME TEACHERS ARE FINDING that drama is a powerful tool for teaching. They are using it to help students learn about history, science, and even math.

One teacher, for example, is using drama to teach about the Civil War. She has her students act out the lives of soldiers and civilians during that time.

Another teacher is using drama to teach about the environment. She has her students act out the lives of animals and plants in a forest.

These teachers are finding that drama is a powerful tool for teaching. They are using it to help students learn about history, science, and even math.

These teachers are finding that drama is a powerful tool for teaching. They are using it to help students learn about history, science, and even math.

## Hold your own mock elections

Students can learn about the democratic process by holding mock elections in their classrooms.

**Objectives:**

- To understand the democratic process.
- To learn about the roles of different branches of government.
- To practice critical thinking and decision-making skills.

**Materials:**

- Ballot boxes and ballots.
- Signs for different candidates.
- Vote counting sheets.

## 3 from PDI to receive UST-EAL outstanding alumni awards

Three graduates of the Philippine Daily Inquirer (PDI) have been awarded the UST-EAL Outstanding Alumni Award.

**Recipients:**

- Mr. [Name]
- Ms. [Name]
- Mr. [Name]

**Awarding Body:** UST-EAL (University of Santo Tomas - Educational Alumni League)
